

DOUBLE FLOOR SYSTEMS

Three sustainable, modular floors for exhibitions and events.

To hire or to buy.

EXPOMOBIL®
Bodenkonzepte für Messe - Event - Objekt

OCTANORM 

Three systems. Two models. One result:

A sustainable, modular floor for your exhibition stands and events.

Choose between three different double floor systems and two models. Rent your double floor from Expomobil® and benefit from the optional installation service of both double floors and flooring. Or buy your double floors from OCTANORM®, knowing that you can rent additional panels should you require them in the future. Either way, you can be sure to have the right double floor system for your project – with maximum flexibility.

Do you need help finding the right solution for your project? Then just ask our double floor teams for assistance!

For rentals:

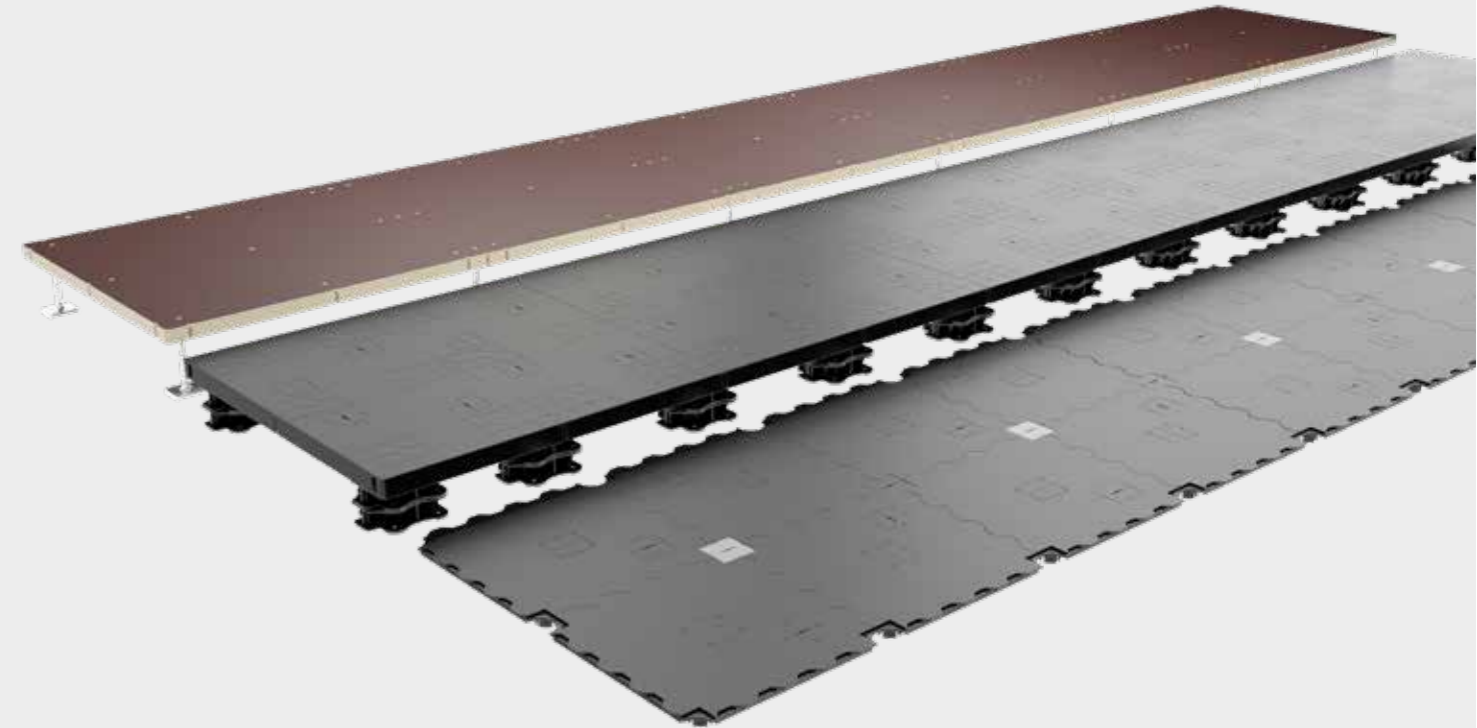

Expomobil® Messezubehör-Vertriebs-GmbH
Raiffeisenstrasse 23
70794 Filderstadt

elevate-floor	 not available for hire		25 m ² per pallet (sales) 23m ² per pallet (rentals) 46-50 floor panels
classic-floor	 not available for hire		25 m ² per pallet 25 floor panels

New products

A proven system can still be improved. Which is why we took a close look at one of our most successful double floor systems for fast and easy installation: the eco-floor.

Two new products that offer even more applications and greater flexibility – both for sales and rentals.

Sloped Edge Solution

Minimise your tripping risk and make your exhibition stand more accessible for all with the new Sloped Edge Solution for eco-floor.

The Sloped Edge System seamlessly attaches to your eco-floor and works with all coverings. The corner element provides seamless trip-free corners, and this plastic solution saves considerable budget compared to metal profile ramps.

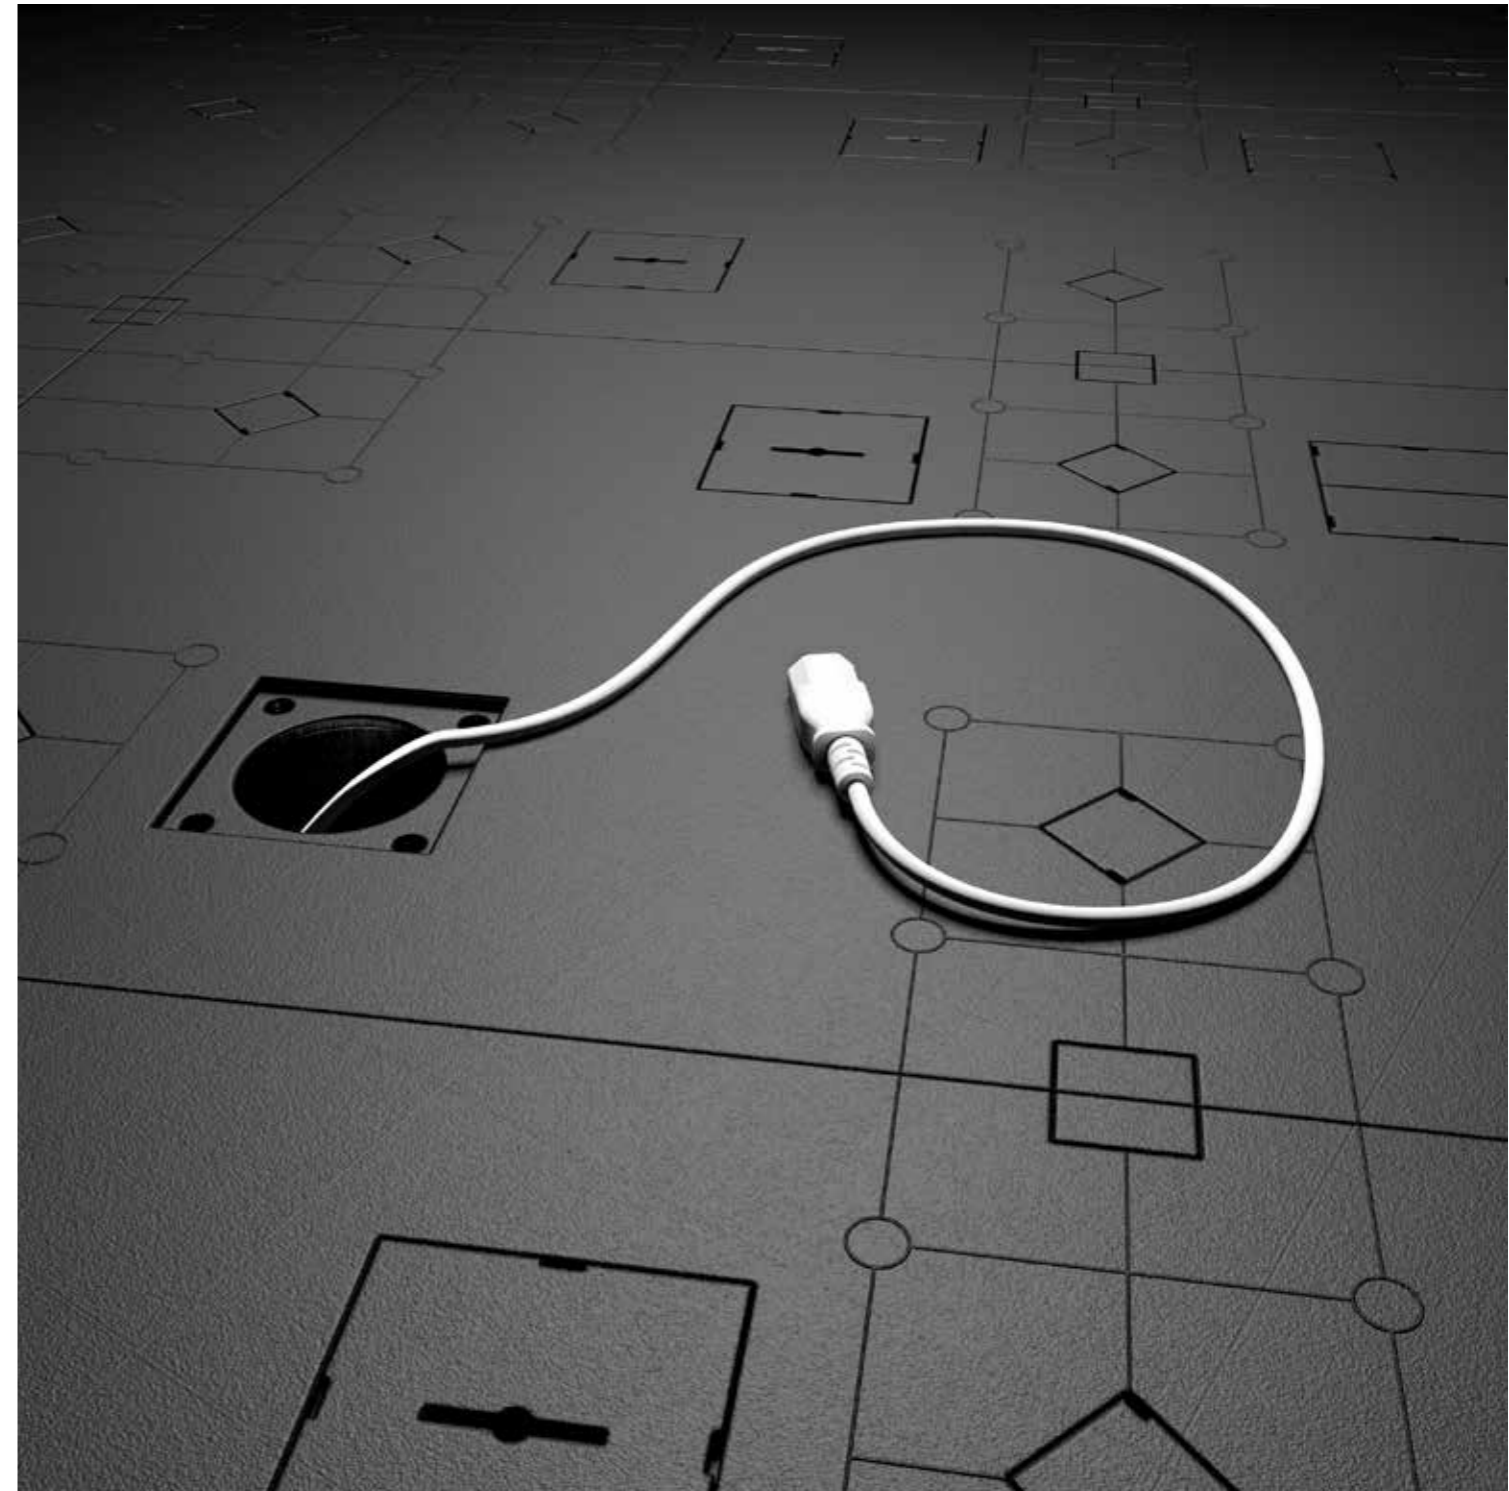

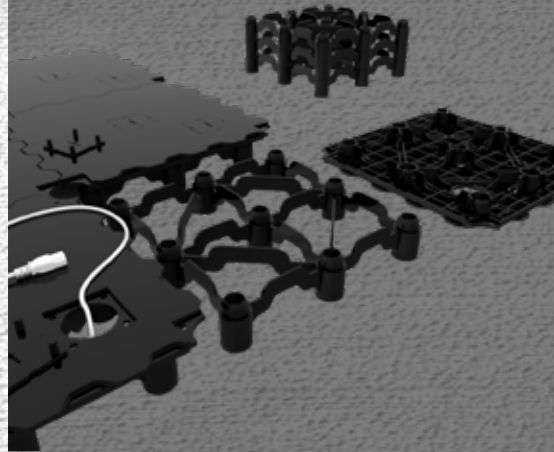

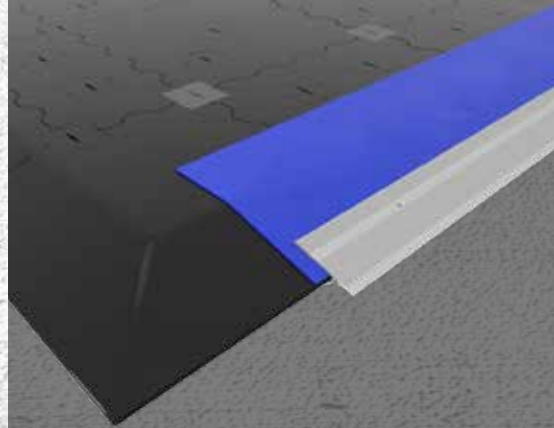

The Sloped Edge Solution is available for both hire and purchase.

Eco Foot Frame

eco-floor has never been this flexible! The new foot frame gives more under floor clearance for pipes and large cables ranging from 54mm to 70mm.

The foot frame is also stackable. A maximum of three foot frames can be stacked, depending on the venue floor conditions. This gives a height range from 100 – 271 mm.

The Foot Frames are only available for sale for now.

The full service option

Expomobil offers a mix-and-match of three components for you to choose from: rentals, floor installation, coverings. Simply combine as many components as you need. If you have any questions, don't hesitate to give us a call!

Rentals

- save storage costs
- save workforce for jobs that matter
- increase your liquidity

Floor installation

- Delivery to where you need it
- Installation and disassembly by us
- Return delivery through us

Coverings

- From carpet to hardwood flooring, our team will lay it for you
- this service is available worldwide

The maximum freedom option

You are looking for a reliable, proven double floor system? You have three to choose from. Our double floor systems aren't just sustainable and amortise after only a few uses. They are also easily supplemented with later purchases or rented components thanks to the systems approach.

Flexible

- easy transportation on pallets
- rebuy or rent additional parts any time in the future

Fast

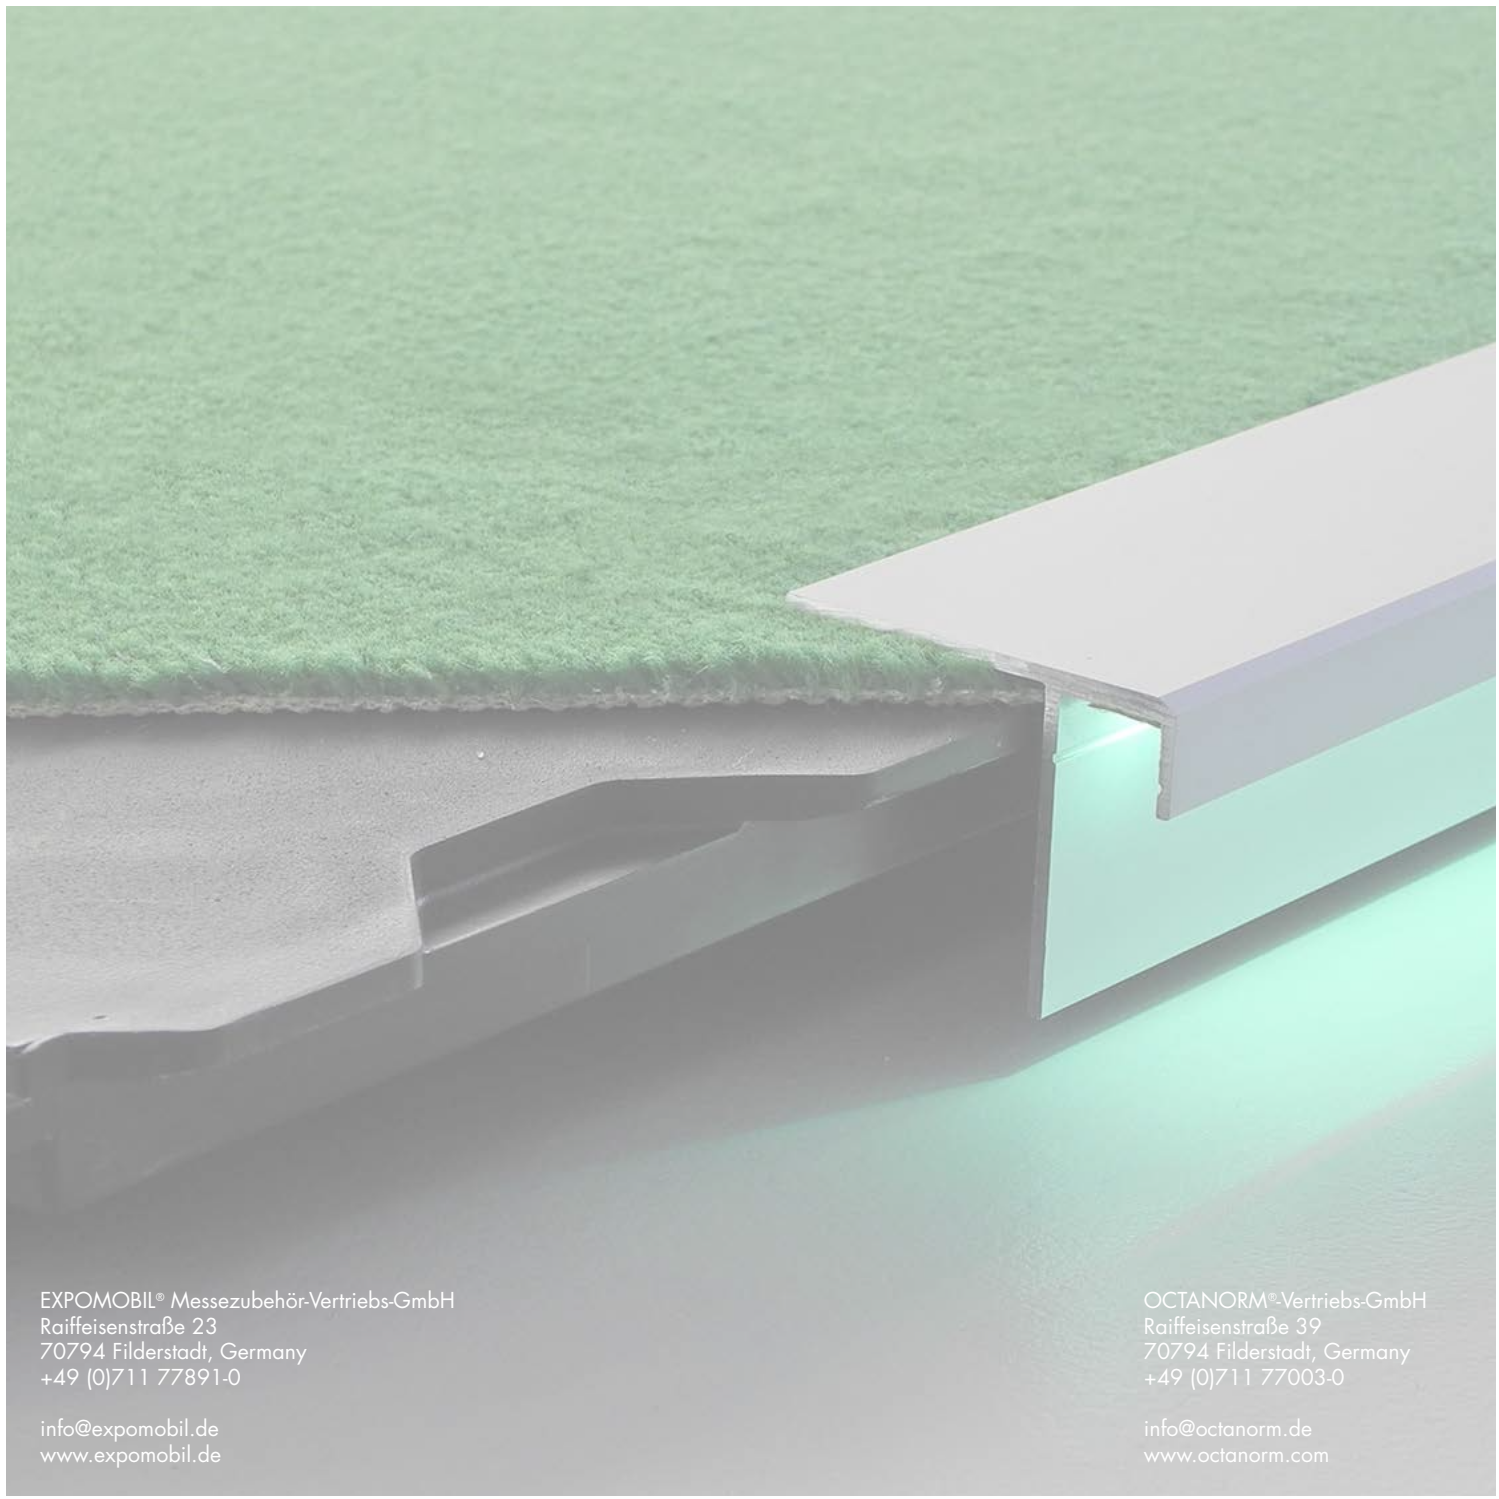

- Installation and disassembly is quick and easy, even with a small workforce

Efficient

- reusable and sustainable
- A few uses are enough for costs to amortise
